## WAGES AND PENSIONS

for a better life

+INFO SHARE.  
pcp.pt/queroassinar

Mr. Prime-Minister

The workers, pensioners, the youth, the people face great hardship in their lives.

Wages and pensions are low (the lowest in the European Union) and lag behind the prices of food, fuel and housing.

Public services are deteriorating and people's lives are harder.

The Government's choices favor the interests and outrageous profits of the economic groups and entail uncertainty for those who work or have retired.

Enough exploitation, injustice and inequality.

**It doesn't have to be this way. Therefore we need, demand and have a right to an general increase in wages and pensions that values purchasing power; to housing, with a reduction in its costs; to the defense and improvement of public services, in particular the National Health Service, the Public School and a public network of free daycare for all children.**

**We want a better life and a developed and sovereign Country with a future.**
